

PIP's guide to COVID-19 for early years children

HELLO!

My name is PIP

You may have seen me before
out and about in town. I like to
help children and their families

Can you say 'Hi'
to me?

This is a
Virus, like the
ones that cause the flu
or a cold which sometimes
make you feel poorly

This one's name is
Coronavirus, or COVID-19,
shall we just call
it COVID?

COVID
loves to travel
and to jump
from hand
to hand

Hi-
five!

Have you
heard about
COVID?

How do you
feel when you
hear COVID's
name?

Relaxed

Nervous

Confused

Curious

Sad

Worried

Or something
else?

I
understand
that

Draw a picture
or pull a face
to show me
how you feel.

That's
funny. I
would feel the
same way

Sometimes adults get
worried when they read the
news or see COVID on TV

There it is again!

But I am
going to
explain COVID
so you can
understand

When COVID
comes to visit, it
sometimes brings...

Fever

Cough

Difficulty
breathing

And sometimes it
visits but people
don't even know!

COVID is
a bit of a
trickster...

COVID doesn't
stay with people for
long, and almost
everyone gets better

Bye
bye!

The grown-ups
who take care
of you will keep
you safe

And you can help too!

By washing your hands with soap
and water while singing a song

You can sing your
favourite song,

the happy
birthday song,

or the
alphabet song,

or by counting
1, 2, 3, 4, 5, 6, 7, 8, 9, 10,
if you can, twice.

If you do
that COVID
will be less
likely to come
to visit!

Why not
practice
it now?

Pretend to
wash your hands!

But while
COVID is
still about

The grown-ups who look after you
may keep you at home a bit more

And you might not be able to
go to nursery or playgroup,
or even school

You might not see your
friends for a while

This is so COVID can't jump
from person to person, making
lots of people poorly

But
don't be sad,
you can have
lots of fun
at home!

Reading
stories

Singing
songs

Making
things

Playing
games

And keep talking
about how you feel.

And while you are doing all that

Clever doctors and
scientists will be hard at
work finding a vaccine

A special medicine that
will allow COVID to say
"Hi!" but without
getting you sick

Well done
doctors!
